

X\$ales® | Store

X\$ales® Store is a digital platform of mobile applications for devices with the Android Operating System. This App makes it easy to configure application distribution, perform mass updates, and execute controlled deployments by creating groups and intelligent segmentation through an Administration Console. With X\$ales® Store, you can manage the release of versions quickly and effectively.

So, ¿Why X\$ales® Store?

X\$ales® Store has an Administration Console that allows the creation and management of different user groups according to their profiles and access levels. These users will be able to access the Mobile Application.
