X$ales℠ | Store

XSales℠ Store is an enterprise solution for Mobile Application Management (MAM), providing organizations with a secure and centralized way to distribute and manage Android business applications.

Through a private enterprise app catalog, IT administrators can publish, update, and manage corporate applications from a cloud-based console, ensuring employees always have secure access to the latest authorized tools they need to perform their work.

So, ¿Why XSales℠ Store?

XSales℠ Store helps organizations streamline mobile application management, improve workforce productivity, and strengthen the security of their enterprise mobility ecosystem. This application is intended exclusively for corporate organizations. Access requires credentials provided by your organization's IT administrator.This application is intended exclusively for corporate organizations.
